Internship Opportunity

Children's Academy CT offers a unique opportunity for individuals who have little to no experience working in the field of Early Intervention, or those who are currently pursuing a bachelors or master's degree in the appropriate fields. Children's Academy CT professionals will act as your mentor, and will offer support, education, and training as they guide you through the field of Early Intervention. They will provide you with reading materials and videos that will enhance your knowledge and understanding of Early Intervention and Autism Spectrum Disorder!

You will be trained in the various therapy methods utilized in the field, and be given the opportunity to apply your skills under the supervision of your mentor. The internship is a three-month program that could lead to a permanent position with Children's Academy CT team. To be considered for the internship opportunity, we ask that candidates meet the following Standards:

- a) Must currently hold or be in pursuit of a Bachelors or Masters degree with a major in Applied Behavioral Sciences, Psychology, Early Childhood Education, or other related field
- b) Must be eager and willing to learn about Autism Spectrum Disorder, Early Intervention, and the needs of families who have children with special needs
- c) Must be open to new ideas, willing to work with and share opinions with a team of other professionals
